FRONTEND DEVELOPER

Summary

Motivated and hardworking junior frontend developer passionate about building responsive, dynamic web applications. Proficient in modern front-end technologies including React.js, JavaScript, and CSS frameworks. Committed to writing clean, maintainable code and continually improving user experience. Eager to leverage my skills in a professional team to contribute to impactful digital products.

Education

Bachelor of Computer Science and Information Technology
Egyptian E-Learning University (EELU) . 2025

Experience & Projects

E-Commerce Web App – Shop Cart

ITI Final Project **.** https://github.com/Ahmed-A4raf/Final-Project-ITI_Shop-Cart.git . Oct 2024 - Oct 2024

- Built a fully functional and responsive e-commerce platform using MERN stack with Firebase integration.
- Supported full shopping experience including categories like bags, headphones, shoes, t-shirts, pants, etc.
- Developed modern and user-friendly UI using React.js, SASS, and smooth animations to enhance UX.
- Implemented cart functionality, product filters, detailed product views, and secure user authentication with Firebase.
- Optimized for performance and scalability with reusable components and clean architecture.

E-Commerce Web App – Waseet

Graduation Project . https://github.com/Ahmed-A4raf/Waseet.git . Feb 2025 - May 2025

- Built a dynamic job marketplace web app using React.js, fully integrated with a scalable backend for real-time interaction.
- Developed two user portals: one for service providers to post listings, and one for admins to manage the platform efficiently.
- Implemented advanced job filtering and search features, enhancing discoverability and user experience.
- Utilized Framer Motion for smooth animations and polished UI transitions.
- Enabled dynamic category creation by admins, allowing users to request or access job categories tailored to their field when not already available.
